## ABOUT ME

Passionate Web Developer and Problem Solver with expertise in frontend and backend development. Skilled in JavaScript, React, Node.js, MongoDB, and Express, with a strong foundation in data structures and algorithms. Dedicated to building responsive and user-friendly applications while optimizing performance and solving complex coding challenges.

## EDUCATION

### 2024 – 2027

Adamas University

### Undergraduate in BCA Hons

Undergraduate BCA (Hons.) student with a passion for web development, programming, and software engineering. Skilled in Node.js, Express, MongoDB, React, Python, and C. Enthusiastic about building scalable applications and gaining hands-on experience in full-stack development.

### 2021 – 2023

Kuikoto Shankari  
Vidyaniketan

### Higher Secondary (Class 11-12)

Completed Higher Secondary with 83% marks, specializing in Computer Applications and Arts, and developed strong programming, creative, and analytical skills.

### 2011 – 2021

Keshiary High School

### Secondary (Class 7-10)

Completed Secondary with 75% marks.

## PROJECTS

### LMS Using Node.JS

A Learning Management System built with Node.js, Express, and MongoDB, enabling user authentication, course management, and progress tracking. It offers a user-friendly dashboard for seamless learning and efficient course administration.

### Weather App

A Python Flask web application that fetches real-time weather data using the OpenWeather API, displaying temperature, humidity, and forecasts for any location.

### Contact Management System

A console-based Python program to add, view, search, update, and delete contacts, making contact management simple and efficient.

## SKILLS

- Python
- C
- MongoDB
- Full-Stack Development
- API Development & Integration
- Problem-Solving & Debugging
